Due to COVID-19 pandemic situation, the conference will be online.

Students Conference on Sensors, Systems and Measurement

Prague, 14-15 June 2021

The aim of the conference is to give students an opportunity to present the results of their research, to improve their presentation skills, to provide the floor for discussion and exchange of ideas and experience. Presentation of the results of the best thesis will also raise awareness of topics solved at different laboratories and broaden the horizons for possible exchange and stays abroad.

The main topics of the conference

- Sensors, Materials and its Application
- Measurement of Electrical and Non-electrical Quantities
- Instrumentation and Measurement
- Testing and Diagnostics
- Signal Processing
- System Identification and Control

There will be only oral presentations and the conference language is English.
